

ACTIVITY 2: HDI AND INDIGENOUS AUSTRALIANS

Students will require either a laptop with software to develop bar graphs, or graph paper.

- Using the UNDP Human Development report 2014 data on HDI at <http://hdr.undp.org/en/content/human-development-index-hdi-table>, plot the Australian HDI value for 2013 on graph paper.
- Go to <http://hdr.undp.org/en/countries> and scroll over the world map to find countries using the key provided.
- Select 4 or 5 developing countries from a variety of HDI Development levels and plot these also.
- Then, plot where Australian Indigenous people fit.
- Discuss whether you think the Indigenous population has the potential to reach sustainable human development or not. Justify your answer.

- Identify the influences from AOS1 Outcome 1 dot point 4 "...influence of health status of developing countries ... income, gender equality..." to explain the changes in HDI ranking over time, as shown in the progressive chart you developed above for the medium and low human development countries.
